All:

Jim DeCastro, NACE Oklahoma State Director, has requested information on bridge standards. If you can provide him any assistance please do so.

Thanks, Tony

---

Do you know how many state DOTs provide county bridge standards for the county commissioners/engineers?

ODOT has produced some bridge standards for Oklahoma counties and the CEDs are questioning some of the parameters ODOT used such as clear roadway width and other things. Anyway we were wondering how many other states have county bridge standards (not state bridge standards) to design from and would they share some of their standards?

Oklahoma's county bridge standards are easily accessible in pdf format from:

<http://www.okladot.state.ok.us/bridge/1999/index-ceR.htm>
